

X12 810 - Invoice

Test attachment - Option A pipeline validation (placeholder content).

This is a small placeholder PDF used to test the "thin .md + embedded/attached real document" pattern for specs whose real source is a DOCX/PDF rather than hand-written markdown: specs/attachments/x12-810-invoice.pdf, picked up automatically by the build-downloads job (zip bundle, Release asset upload, and the Downloads section link).

Note: this is original placeholder text for pipeline testing. It is not a reproduction of the official ASC X12 standard, which is licensed and sold by X12.org.
